MAKE IT YOUR WAY!

**Affordable
and
Easy to Use**

15993 UNIVERSAL COLOR COAT

Formulated to create custom aerosols using SEM COLOR COAT toners, the leading interior refinish system for over 25 years.

61003 MULTI COAT

Versatile blend to work with enamel, lacquer and vinyl resin systems.

THE FREEDOM YOU NEED FROM THE BRAND YOU TRUST!

BLANK AEROSOLS

15993 UNIVERSAL COLOR COAT is a unique solvent blend designed to work specifically with **COLOR COAT** toners to create high quality aerosols.

61003 MULTI-COAT works with most lacquer, acrylic, vinyl and enamel based systems to produce custom aerosol blends.

APPLICATION:

These cans are custom blends of solvent and are charged with propellant. They can be filled only with a manual or pneumatic paint pump, based on the pump manufacturer's directions. **DO NOT OVERFILL!** Follow the directions on the pump and, once filled, the cans work like any other aerosol.

Recommended Fill Weights: 15993: 180 grams of **COLOR COAT**
 61003: 100 grams of selected paint

NOTE: Since SEM has loaded only the propellant and solvent, the filler assumes all responsibility for completing the filling procedure and for any injury or damage that may result.

The Right Choice
